

Louisiana's Water

The rain drop falls right from the cloud,

Which drops on the flower's petal!

The flower blooms while the sun sparkles on the Louisiana day!

But where the crawfish play in the beautiful fresh water, something spreads
above them a gorgeous stunning rainbow! They watch it dazzle above them as the
sun passes down, then time to go nighty night. Tuck in little fellows say your prayers
as the water settles in, till sun rise again and another beautiful Louisiana day!
